SEVENTEENTH ANNUAL REPORT OF THE EXECUTIVE BOARD OF THE MONTANA STATE INDUSTRIAL SCHOOL, JUNE 30, 1925

To the State Board of Education and State Board of Examiners:

Herewith is submitted the annual report of the Montana State Industrial School, Miles City, Montana, for the year ending June 30, 1925.

POPULATION

The population at this time is 119, being thirty-one higher than a year ago.

The average population for the year was 116, and during the past four months reached the highest point in the history of the School, there being 140 boys on roll for a short time.

Seventy-five new boys were admitted during the year, and fourteen were returned for violation of parole. Sixty-two boys were paroled during the year, including several of the younger boys who have been released on temporary parole and who will return in the Fall to attend school.

The average length of stay in the School for those paroled for the first

time was one year, five months and twenty days. The average age of those committed the past year was a trifle less than fourteen years.

DISCIPLINE

The discipline of the School as a whole has been good. There were but six escapes during the year where boys were gone over night. Two of these were not returned, one being now under arrest in Idaho, and if not convicted there will be returned here; and the other we think has been removed to another State by his parents.

Discipline is maintained almost entirely by forfeiture of merits or loss of privileges. At the holiday time, fourteen boys were allowed to go home for a week and visit their relatives, all returning when told to. This privilege is eagerly worked for and appreciated by the boys and their folks.

HEALTH

A report of the attending physicians is attached hereto. There has been very little sickness, no serious cases and no deaths.

In addition to the removal of diseased tonsils and adenoids, circumcisions and other minor operations and the correction of defective visions, twice each year each boy is gone over by the dentist and his teeth put in good condition. All boys are compelled to brush their teeth each day, brushes and dental soap being furnished by the School.

The new Hospital has been occupied since the first of April, all minor operations being performed here and suspicious cases of contagion being isolated without endangering other boys.

SCHOOLS, SHOPS, ETC.

The heads of each of these departments have made reports of the work accomplished, and same are attached hereto.

Twenty-one eighth grade boys took the State Examinations in May and seventeen passed successfully. Five boys attended high school at the Custer County High School and completed the year's work with credit.

The Shoe Shop, Tailor Shop and Print Shop were moved into their new quarters the latter part of February. A new department, the Auto Mechanic Shop, has been added, which we hope will be of great benefit to a few boys each year.

FARM AND GARDEN

I wish to call your attention to the report of Farm and Garden Produce raised the past year. At reasonable market values we raised a total of \$23,340.27 worth of produce; deducting that which was fed to the stock and poultry, there was a balance of \$17,408.52 worth consumed by the boys. All this came from a farm of but 283 acres of irrigable land. Only about 2000 pounds of meat were purchased during the year, the balance being provided by the farm.

Crops and gardens are looking good this year, and there should be a sufficient supply for our own use.

IMPROVEMENTS

The new buildings, Kitchen, Hospital and Industrial Building, also the Water Tank, started last year, have been completed and are now in use. The buildings are modern in every respect and are a credit to the State. Some more new equipment will be necessary and will be installed this year.

Sidewalks leading to and around the new buildings have been laid by the boys, as were also all steam and water connections and about three hundred feet of water main and nearly a thousand feet of sewer pipe.

The report of the carpenter shop foreman covers minor improvements made. An allowance of \$50,000 for a new heating plant and \$1,500 for other minor improvements was made by the Board

at the meeting in May. Plans for this work are being gotten out at this time, with the hope of completing same before winter.

OFFICERS

The roster of officers with salaries paid is submitted herewith. While some salaries have been increased, it has been done without any increase of the aggregate.

RESPECTFULLY SUBMITTED

A. C. DORR

W. E. HOLT

F. R. SAVAGE

EXECUTIVE BOARD

Medical Report

We submit herewith the annual report as physicians for the Industrial School for the period July 1, 1924 to June 30, 1925.

During this period we have hospitalized at the Sisters' Hospital four cases of appendicitis and one case for the removal of a silver plate from the leg of one of the boys.

Since the completion of the Hospital at the School, we have done twenty-two tonsillectomies and fourteen circumcisions.

We feel that the completion and equipping of the Hospital was a step forward and are very glad to see the completion of this improvement, which has been recommended so often.

The general health of the School and also the sanitary conditions have been good indeed, and we have no further recommendations to make along these lines.

Very truly yours

Dr. Andrus & Garberson
School Physicians

Net value of all produce.....\$17,408.52

School Of Letters

The past year in our School grades has been very successful. During the school year, all of our boys who have not completed as high as the eighth grade work are sent to school. They attend classes half of each day (except Saturday and Sunday) for eight months, and work at their respective trade occupations the other half of each day. The State Course of Study is very closely followed, and was completed by all classes this year in spite of some interruptions due to sickness of officers.

Seventeen out of twenty-one eighth grade boys passed the State Examinations and received diplomas entitling them to enter High School. Of the four who failed to get diplomas, two missed only one subject each, and the other two, three subjects each. Twenty-two boys passed the seventh grade examinations and were promoted to the eighth grade, one failing. Of fifty-seven boys enrolled in grades lower than the seventh, only five failed to be promoted.

We have had about thirty-five boys at the institution during the past year who did not attend school at all, they being eligible for high school and we having no facilities for teaching high school subjects. These boys spent their entire day at their respective trade occupations. We had five paroled boys attending the High School in town and living here at the Institution, all of whom passed all subjects with high honors.

The boys have recreation periods

from 12:00 A. M. to 1:00 P. M. and from 6:00 P. M. to 8:00 P. M. each day, and all of Saturday afternoons, and all of Sundays except the time that is devoted to Sunday School classes and Chapel Services. The recreation periods are spent on the play-grounds when the weather permits, and in the company reading rooms or in the gymnasium when the weather is stormy or cold. The School has many fine reference books and a good library which the boys make use of in their leisure hours. The gymnasium furnishes a splendid place for the boys to play games during the long winter months, and their play here is directed by the low grade teacher, who acts as athletic director and coach, and arranges for outside games between the different School teams and teams from town.

At the start of the School term last Fall, Mrs. Emma Dahl had charge of high grades of companies A, B & D, until relieved in March by the writer. Mr. L. E. Stanley taught the low grades of the three larger companies during the entire term, and Mrs. Edythe Johnson taught the Company C boys as in the preceding two years. These Company C boys comprise a group ranging from eight to twelve years of age, from thirty to forty in number, and they are kept entirely segregated from the older and more experienced boys.

Respectfully submitted,

J. D. Skinner

High Grade Teacher

Manual Training Department

Unlike the ordinary manual training course as generally taught, all of our work is practical construction, and is varied so that each boy by applying himself will, during his stay here, be as well or even better fitted to take up carpentry as one who has served two or three years' apprenticeship. In this department the boys are taught carpentry, cabinet work, general repairing, painting, some detail drawing, and general lathe work, in which each boy gets some instruction and those who have any ability at all in this line get all the more intricate cuts to fit them for anything that can be done.

Everything except the brick buildings on the grounds are built by the boys of this department, all furniture used at the institution is made here, and all kinds of repairing and glazing done by the carpenter shop boys. The more important items of work performed during the past year are listed below, minor repair jobs not being included:

Construction work

Built four concrete piers for Water Tank, including excavation, driving of piles and footings.

Tore down old brick outbuilding and moved two old frame outbuildings to make room for Water Tank.

Built new frame and platform for wagon scales.

Built two new sections of Poultry House.

Built new drum sander for Carpenter Shop.

Built 288 sq. ft. of shelving in basement of new kitchen.

Framed, plastered and finished partition for stock room in new tailor shop.

Built partition for tool room in new auto shop.

Built work bench for auto shop.

Built new nest boxes for poultry houses.

Laid 3300 sq. ft. of sidewalk to new buildings.

Built poles and set up antenna for boys' radio.

Cabinet work

Four kitchen cabinets and cupboards.

Four tailor shop tables.

Three kitchen tables.

Two kitchen benches.

One hospital instrument table.

One pedestal for chapel.

One wagon box and four wagon tongues and four double-trees.

One four-section filing cabinet for office.

Two clothes racks and eighty-four coat hangers.

Thirty seven door and window screens for new buildings.

One cabinet for boys' radio.

Thirteen new chairs.

Eighty-six new cane seats for chairs.

General repair and upkeep

Painted four wagons and all benches on grounds.

Built and painted metal ceiling in three rooms of office building.

Plastered old poultry houses.

Repaired and replaced all screens, doors and storm windows.

Set up kitchen equipment and hung shades in new buildings.

Varnished 1240 sq. ft. of floor.

Painted walls and ceiling of five rooms.

Painted outside of dairy barn, silo, garage, poultry houses and sheds.

Respectfully submitted,

C. A. Parr

Carpenter Instructor

Print Shop

During the past year, six boys have received training in printing in this shop. During the last week in January we moved our type cases and make-up stones into the new shop, but did not get the presses moved until the latter part of March. We are now well settled in the new quarters, and it is a vast improvement over the old shop. There is more than twice as much room, doing away with much of the confusion of the old small shop, and the absence of vibration when the presses are running makes it considerably more pleasant. There is much better light both on the cases and on the presses, and considerable more room around the presses.

There is no printing instructor, the more experienced boys showing the new ones what they have learned, and what supervision and direction that is necessary coming from the undersigned. Our chief work each month is to get "The Boys' Messenger" out, which takes two boys working all day about three weeks to set up (by hand) print and distribute again, and prepare for mailing. This paper gives all the Institution news, with detail notes written by various boys. Twelve hundred copies are printed each month, our mailing list now being nearly one thousand, including parents and relatives of boys here, various County and State officials, and others interested in the Institution.

Our equipment consists of a power rotary press and a small job press. Our body type, which has been in use for eleven years, is nearly worn out, and should be replaced with new body type. We also need a little more job type.

All the printing needed by the institution is done here, in addition to getting out the paper, the following being a list of job work turned out in the past year:

Letterheads, boys	5000
Letterheads, office	1500
Letterheads, mimeograph	1500
Envelopes	6000
Mailing wrappers	8000
Requisition blanks, padded	5000
Boys' order blanks, padded	5000
Misconduct reports, padded	1000
Repair order blanks, in triplicate, for auto shop, padded	1500
Voucher backs, padded	1000
Book lists	500
Detail slips	500
Report cards	800
Library cards	200
Prescription blanks	400
Medical history sheets	200
Book cards	100
Xmas cards	150
Hymn books, 12 pages	150 copies
Annual reports, 24 pages	80 copies

Respectfully submitted,
W.F. Leimert
Secretary

Tailor Shop

Work in the Tailor Shop during the past year has been considerably broken up due to changes of instructors. Mr. Terry Walsh was in charge at the beginning of the year but resigned in September and was replaced by Mr. John Souhrada. Mr. Souhrada resigned in February and for about six weeks the shop was without an instructor until the undersigned took charge about the middle of March.

The Tailor Shop was moved to the spacious new quarters about the middle of February, and the improvements in working conditions make it possible to turn out more and better work and under considerably more healthy conditions. The new shop is more than twice as large as the old one, has excellent light on three sides, stays cool in the summer, and has an abundance of shelf space. A stock room partitioned off at one corner is an added feature that is a great improvement.

All the clothes worn by the boys are made in this department, and every boy who is paroled is measured and a new suit made for him. All boys' clothing is inspected each week when it comes from the laundry, all necessary mending and repairing done and all worn out articles replaced with new. All household linens, etc., are made in the shop.

About eight boys are regularly employed here. The total supplies purchased for the tailor shop in the past year amounted to \$2,600.00, and the fol-

lowing goods were turned out in addition to repairs:

Parole suits	49
Parole suits remade	13
Uniform coats	22
Uniform trousers	40
Uniform caps	8
Jean trousers	38
Khaki coats	16
Khaki trousers	68
Khaki caps	24
Denim jumpers	8
Waist overalls	94
Denim caps	6
Work shirts	248
Kitchen shirts	99
Night gowns	218
Union-suits	29
Waiters' jackets	4
Waiters' trousers	10
Cooks' caps	32
Cooks' aprons	36
Creamery aprons	6
Carpenters' aprons	10
Dish towels	55
Hand towels	101
Mittens, prs.	130
Stocking feet	449
Garters, prs.	53
Laundry bags	9
Sheets	105
Pillow slips	175
Curtains	20
Window shades	9

Respectfully submitted,
C. M. Christensen,
Instructor.

Auto Shop

The Auto Shop, a new department made possible by the completion of the new Industrial Building, has been in operation only the last three months but it is getting pretty well organized, and three boys are getting the practical training here necessary to make them auto mechanics. While the Shop was ready for occupancy by February 1st, the equipment was not all received until the latter part of March, since which time about twenty-five jobs have been worked on. This work is all done under the supervision of the instructor, the boys being shown the proper way to the various jobs, and in the time they spend here, they should become quite familiar with the workings of an auto. We have a fine large shop, with splendid equipment. The different cars and trucks belonging to the institution are kept in repair here, and work is done on private cars belonging to officers at cost. Efforts will be made to make the department self-supporting.

Respectfully submitted

F. C. Crilley
Instructor

Shoe Shop

The end of February saw the Shoe Shop moved into its fine new quarters in the New Industrial Building, and we are now well settled again. Our new shop, while just a little larger than the old shop, is much better arranged, giving us more working room and more shelf space, is light and airy, and very much cooler in the summer than the old shop. Five boys are working in the shop now, and they get so they can do everything but cut out the leather. All the shoes worn by the boys are made and repaired here. Considerable harness work is also done, and all repairing of baseballs, footballs, belts, gloves, etc. The following is a list of work turned out, on an expenditure for leather and findings of around \$700 00:

New Sunday Shoes	36 pr.
New Work Shoes	263 pr.
Baseball Shoes	12 pr.
Shoes Half-soled	551 pr.
Shoes re-heeled	570 pr.
New 'tips made	146 pr.
New fronts made	7 pr.
Shoes sewed	657 pr.

Respectfully submitted,
John Jespersion
Instructor

THE MELON PATCH

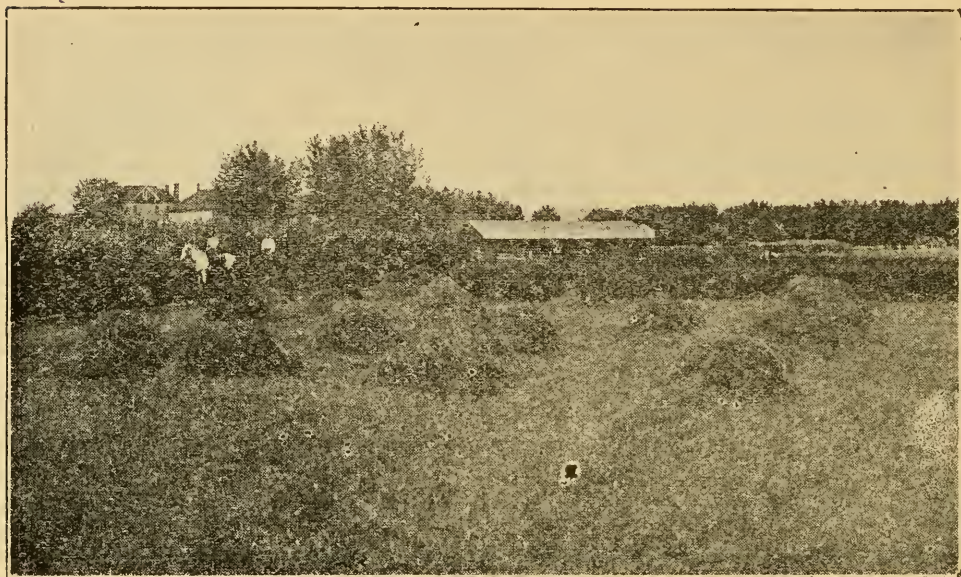

A SAMPLE OF OUR CORN

A GLIMPSE OF OUR GARDEN

IN THE BEET FIELD

A BIT OF OUR HAY

WAY DOWN YONDER IN THE CORN FIELD
